

Important Information Regarding the Contents of this Document

Please note that the policies and information presented in this document are current through the date given below. The documents made available within the [Center's Conservation Districts web pages](#) are intended to serve as a guide for the policies set by each Conservation District. While these policies may in fact be current at the time of your viewing, it is strongly recommended to contact the relevant Conservation District for the most current version.

Document Current Date: May 27, 2015

Lehigh County Conservation District

Road Program

Non Pollution Standards

Section 9106 (f)(7) of the PA Motor Vehicle Code requires Quality Assurance Boards to adopt standards that prohibit use of materials or practices that are environmentally harmful. The Statement of Policy 83.613 (1)(b) formalizes that requirement. In response, the Lehigh County Conservation District QAB has adopted standards prohibiting the use of materials or practices which are environmentally harmful or do not meet the programs' "non-pollution" standard. These materials include, but are not limited to: noxious weeds, fugitive emissions, and dust control products which may pose a problem if they enter a waterway. Compliance with all existing environmental laws is a condition of purchase under the contracting agreement between the Lehigh County Conservation District and the municipality. An environmentally suitable substitute for dust control, as determined by the State Conservation Commission, may qualify for payment.
